

Vivek L. Kale

phone: +01 1-217-369-7996 . *e-mail:* vivek.lkale@gmail.com . *web:* <http://vivek112.googlepages.com>
U.S. Citizen

Education

Bachelor of Science: University of Illinois at Urbana-Champaign, 2007

Doctor of Philosophy: University of Illinois at Urbana-Champaign, 2015

Advisor: William D. Gropp

Awards

- 2018 Argonne Training Program on Exascale Computing Invitee and Participant
- SC 2017 Early Career Program Invitee and Participant
- 2015 Heidelberg Laureate Forum Invitee and Participant.
- Fellow at Lawrence Livermore National Laboratory through Lawrence Scholar Program.
- Recipient of 2015 Heidelberg Laureate Forum Travel

Courses Taken

Technical Skills

Experience

Charmworks, Inc. Software Developer Jun '18 - present

- Integrating a shared memory library for sophisticated loop scheduling strategies, with some strategies being based on strategies I've developed for my dissertation, into the current version of Charm++.
- Comparing performance of a loop scheduling strategy available in the integrated shared memory library with the performance of the corresponding loop scheduling strategy available in LLVM's OpenMP library.
- Providing feedback for tutorials on Charm++ to improve them.

University of Southern California Computer Scientist Dec. '16 - Jun '18

- Working with postdoc from LLNL on a proposal to study techniques that combine loop scheduling and load balancing to improve performance of scientific applications.
- Working with OpenMP Language Committee to support <https://sites.google.com/site/userdefschedopenmpuser-defined-schedules-in-openmp>.
- Translating an x-ray tomography code written in Matlab code to C code and then parallelizing it to run on a supercomputer having nodes with GPGPUs.
- Working on modifications to LLVM compiler to support new OpenMP loop schedules.
- Worked on ensuring external network infrastructure to support transfer of application code's input data files were adequate for an application code's efficient execution using the Globus Toolkit.
- Working in team to manage computational performance aspects of running an application program involving Fast Fourier Transformation and image reconstruction algorithms.

Charmworks, Inc. Developer Jan. '16 - Nov. '16

- Implemented mixed static/dynamic loop scheduling strategies within Charm++'s thread scheduling library.
- Helped to improve portability of Charm++ to a variety of platforms.
- Assisted with business aspects of a high-tech startup.

University of Illinois Postdoctoral Associate Jul. '15 – Dec. '15

- Developed library that allows application programmers to use strategies from dissertation.
- Adapted a plasma physics application code to work on a GPGPU processor and Intel Xeon Phi.
- Incorporated over-decomposition and locality-aware scheduling into strategies from dissertation.

Lawrence Livermore Nat'l Lab Lawrence Scholar Feb. '12 – Jun. '15

- Measured MPI communication delays for micro-benchmarks codes run on supercomputers and worked to find tools to measure dequeue overheads of OpenMP loop schedulers.
- Created a software system for automated performance optimization and application programmer usability of low-overhead hybrid scheduling strategies.
- Developed a ROSE-based custom compiler for automatically transforming MPI+OpenMP applications to use low-overhead scheduling techniques and runtime.
- Assessed further opportunities for performance improvement of low-overhead schedulers, including improvement of spatial locality of low-overhead schedulers.

Lawrence Livermore and Berkeley Nat'l Lab Scholar Jun. '10 - Sep. '10 / Jun. '11 - Sep. '11

- Experimented with different OpenMP parameters of implemented MPI+OpenMP application code to understand performance optimizations on LLNL supercomputers.
- Analyzed results for the performance tests developed on NERSC machines, and compared with collectives in reference to MPI (mpich2) runtime system.
- Modified OpenMP gomp runtime system in order to integrate low-overhead schedulers within it.

Goldman-Sachs Summer Analyst Jun. '09 – Sep. '09

- Wrote code for testing trading system infrastructure functions under extreme market conditions.
- Analyzed performance bottlenecks of system infrastructure functions.

Research Overview

List of Publications

1. Vivek Kale and Martin Kong. *Enhancing Support in OpenMP to Improve Data Locality in Application Programs Using Task Scheduling*. OpenMPCon 2018. September 2018. Barcelona, Spain.
2. Vivek Kale, Harshitha Menon and Karthik Senthil. ***Adaptive Loop Scheduling with Charm++ to Improve Performance of Scientific Applications***. SC '17. November 2017. Denver, USA. *(Selected as a Candidate for Best Poster)*
3. Vivek Kale and William D. Gropp. ***A User-defined Schedule for OpenMP***. Extended Abstract. OpenMPCon 2017. September 2017. New York, USA.
4. Vivek Kale, Harshitha Menon and Karthik Senthil. ***Adaptive Loop Scheduling with Charm++ to Improve Performance of Scientific Applications***. Technical Report. University of Southern California. May 2017.
5. Vivek Kale and William D. Gropp. ***Composing Low-Overhead Scheduling Strategies for Improving Performance of Scientific Applications***. IWOMP 2015. October 2015. Aachen, Germany.

6. Vivek Kale, Simplicé Donfack, Laura Grigori and William D. Gropp. *Balancing the Trade-off Between Load Balancing and Locality to Improve Performance of Scientific Applications*. SC '14. November 2014. New Orleans, USA.
